

Articles & Texts Supporting Chiropractic and/or Chiropractic Neurology for TBI, Learning & Behavioral Difficulties:

1. Alcantara, J., & Davis, J. (2004). Prospective cohort of ADHD patients under chiropractic care. *Pathways to Family Wellness*, 4.
2. Araghi, H.J. (1994). Oral apraxia: A case study in chiropractic management. *Proceedings of the ICA National Conference on Chiropractic and Pediatrics*, Dallas: 34-41.
3. Aranha, K.M. (2006). A comparison of posture control: typically developing children vs. children with ADHD. *Texas Tech University Electronic Theses and Dissertations*, Retrieved May 27, 2010 from <http://dspace.lib.ttu.edu/handle/2346/1081?show=full>.
4. Arme, J. (1993). Effects of biomechanical insult correction on attention deficit disorder. *Chiropractic Case Reports* 1(1) Jan.
5. Barnes, T.A. (1995). A multi-faceted chiropractic approach to attention deficit hyperactivity disorder: A case report. *ICA International Review of Chiropractic* Jan/Feb: 41-43.
6. Bastecki, A.V., Harrison, D.E., & Haas, J.W. (2004). Cervical Kyphosis is a possible link to attention-deficit/hyperactivity disorder. *Journal of Physiological Therapeutics*, 27(8): 525e1-525e5.
7. Bedell, L. (2008). Successful care of a young female with ADD/ADHD & vertebral subluxation. *Journal of Vertebral Subluxation Research*, June: 1-7.
8. Behrendt, M., & Olsen, N. (2004). The impact of subluxation correction on mental health: Reduction of anxiety in a female patient under chiropractic care. *Journal of Vertebral Subluxation Research*, September: 1-10.
9. Biedermann, H. (2005). Manual therapy in children: Proposals for an etiologic model. *Journal of Manipulative Physiological Therapeutics*, 28(3): e1-15.
10. Bloink, T. (2008). Autism and language delay, integration of SOT, cranial therapy and Tomitis auditory therapy to stimulate the auditory cortex: A case report. *Journal of Vertebral Subluxation Research*, May: 17.
11. Blum, C.L., Cuthbert, S., & Williams, S. (2007). Developmental delay syndromes and chiropractic. *International Conference on Chiropractic Research*, May 17-19, 2007: CM53.
12. Brzozowski, W.T., & Walton, E.V. (1980). The effect of chiropractic treatment on students with learning and behavioral impairments resulting from neurological dysfunction (Part 1). *Journal of the Australian Chiropractic Association*: 11(7): 13-18.
13. Brzozowski, W.T., & Walton, E.V. (1980). The effect of chiropractic treatment on students with learning and behavioral impairments resulting from neurological dysfunction (Part 2). *Journal of the Australian Chiropractic Association*: 11(8): 11-17.
14. Collins, K.F., et al. (1994). The efficacy of upper cervical chiropractic care on children and adults with cerebral palsy: A preliminary report. *Chiropractic Pediatrics*, 1(1): 13-15.
15. Fallon, J. (2003). *Autism Digest*
16. Frymann, V. (1988). Learning difficulties of children viewed in the light of osteopathic concept. In: Retalaff, E.W., Mitchell, F. (Eds). *The cranium and its sutures*, New York: Springer 27-47.
17. Frymann, V.M., Carney, R.E., & Springall, P. (1992). Effect of osteopathic medical management on neurological development in children. *Journal of American Osteopathic Association*, 92(6): 729-744.
18. Giesen, J.M., Center, D.B., & Leach, R.A. (1989). *Journal of Manipulative Physiological Therapeutics*, 12:5 353-363.
19. Goff, P.J. (1987). Chiropractic treatment of mental illness: A review of theory and practice. *Research Forum*, Autumn.
20. Hartmann, G. W., & Schwarz, H.S. (1949). An analysis of 350 emotionally maladjusted individuals under chiropractic care. *NCA Journal of Chiropractic*, Nov.
21. Hoffman, N., & Russell, D. (2008). Improvement in a 3 ½ year old autistic child following chiropractic intervention to reduce vertebral subluxation. *Journal of Vertebral Subluxation Research*, March: 1-4.
22. Hospers, L.A. (1992). EEG and CEEG studies before and after upper cervical or SOT category II adjustment in children after head trauma, in epilepsy, and in "hyperactivity". *Proceedings of the National Conference on Chiropractic and Pediatrics (ICA) 1992*: 84-139.
23. Jennings, J. & Barker, M. (2006). Autism: A chiropractic perspective. *Clinical Chiropractic*, 9(1): 6-10.
24. Khorshid, K.A., Sweat, R.W., Zemba, D.A., & Zemba, B.N. (2006). Clinical efficacy of upper cervical versus full spine chiropractic care on children with autism: A randomized clinical trial. *Journal of Vertebra Subluxation Research*, March: 1-7.
25. Kidd, P.M. (2000). Attention deficit/hyperactivity disorder (ADHD) in children: Rationale for its integrative management. *Alternative Medicine Review*, 5(5): 402-408.
26. Koren, T. & Rosenwinkel, E. (1992). Spinal patterns as predictors of personality profiles: A pilot study. *International Journal of Psychosomatics*, 39(1-4): 10-17.
27. Kuhn, K.W. (2005). An assessment of Carrick's brain-based model of care in the treatment of functional disconnection syndrome: A case study. *ProQuest Dissertations & Theses*, Retrieved from <http://gradworks.umi.com/31/96/3196726.html> on May 27, 2010.
28. Labarbera, J.A. (1998). Tourette syndrome: A case study. *International Chiropractic Pediatric Association Newsletter* March/April.
29. Lanley, C. (1994). Epileptic seizures, nocturnal enuresis, ADD. *Chiropractic Pediatrics*, 1(1).
30. Levy, S. & Hyman, S.L. (2002). *Alternative/Complementary Approaches to Treatment of Children with Autistic Spectrum Disorders*. *Infants & Young Children*, 14(3): 33-42.
31. Lovett, L. & Blum, C. (2006). Behavioral and learning changes secondary to chiropractic care to reduce subluxations in a child with attention deficit hyperactivity disorder. *Journal of Vertebral Subluxation Research*, October: 1-6.
32. Maddock, D. (2008). An introduction and review of the diagnosis of attention deficit hyperactivity disorder. *Journal of Vertebral Subluxation Research*, May: 16.
33. Mathews, M.O., & Thomas, E. (1993). A pilot study of applied kinesiology in helping children with learning disabilities. *British Osteopathic Journal* Vol. X11.
34. Melillo, R. & Leisman, G. (2004). *Neurobehavioral disorders of childhood: an evolutionary perspective*. New York: Springer.
35. Phillips, C.J. (1991). Case study: The effect of utilizing spinal manipulation and craniotherapy as the treatment approach for attention deficit-hyperactivity disorder. *Proceedings on the National Conference on Chiropractic and Pediatrics (ICA)*, 1191: 57-74.
36. Pauc, R. (2005). Comorbidity of dyslexia, dyspraxia, attention deficit disorder (ADD), attention deficit hyperactivity disorder (ADHD), obsessive compulsive disorder (OCD) and Tourette's syndrome in children: A prospective epidemiological study. *Clinical Chiropractic* 8(4): 189-198.
37. Peterson, K.B. (1997). The effects of spinal manipulation on the intensity of emotional arousal in phobic subjects exposed to a threat stimulus: A randomized, controlled, double-blind clinical trial. *Journal of Manipulative Physiological Therapeutics*, 20(9): 602-606.
38. Potthoff, S., Penwell, B., & Wolf, J. (1993). Panic attacks and the chiropractic adjustment: A case report. *ACA Journal of Chiropractic*, 30: 26-28.
39. Risley, W.B. (1995). Impaired arterial blood flow to the brain as a result of a cervical subluxation: A clinical report. *Journal of the American Chiropractic Association*, June: 61-63.
40. Schetchikova, N.V. (2002). Children with ADHD: Medical vs. Chiropractic Perspective and Theory. *ACA Journal*, July: 28-38.
41. Schetchikova, N.V. (2002). Children with ADHD: Medical vs. Chiropractic Perspective and Theory. *ACA Journal*, August: 34-44.
